

Audience Builder — The Story Behind the Product

Problem → Solution → Outcome

PROBLEM

Enterprise teams were drowning in fragmented targeting data. Account lists in endless spreadsheets

- Intent signals scattered across tools
- No unified way to validate or refine target audiences
- Slow, error-prone, manual segmentation
- Difficult to align sales + marketing on “the right accounts”

Users knew they had the data...
but not the clarity.

SOLUTION

Audience Builder — a unified, intelligent audience creation platform.

- Centralized space to upload lists, apply filters, and build segments
- Real-time scoring via APIs
- React-based dynamic UI for faster workflows
- Smart insights: ICP match, intent scoring, lookalike audiences

Everything users need to define, refine, and activate audiences — **In one place.**

OUTCOME

More accurate targeting, faster decisions, and confident go-to-market execution.

- Audience creation time reduced dramatically
- Teams aligned on a single source of truth
- Higher-quality segments leading to better campaign performance
- Less manual work, fewer errors
- Scalable for enterprise data volumes

Audience Builder transformed “guesswork targeting” into **data-driven precision.**

AUDIENCE BUILDER

APPLICATION

Audience Builder is an enterprise marketing intelligence tool that centralizes all key audience insights in one place.

It allows users to:

1. **Monitor Product Markets** based on fit scores, engagement patterns, and market readiness.
2. **Identify In-Market Accounts** using real-time intent signals at the company and contact level.
3. **Create Custom Audiences** by combining filters such as region, industry, role, and product demand.
4. **Analyze Campaign Reports** through downloadable insights that support ongoing optimization.

MY ROLE

- Led the UI/UX design of the Audience Builder dashboard.
- Partnered with product managers and other stakeholders to define KPIs (product markets, account intent, campaign reports).
- Created intuitive navigation and clean visual hierarchy to simplify complex data.
- Ensured scalability for enterprise customers through modular design.

Welcome Olivia from Vectra AI

KEY FEATURES & INSIGHTS

THE SALES TEAM RECEIVES WARMER LEADS, REDUCING WASTED OUTREACH

Total Product Markets

Accounts currently in market

Challenge

The marketing team had a large database of prospects but struggled to:

- Pinpoint which accounts were currently in the market for their solutions.
- Build precise, high-value audiences for targeted campaigns.
- Track performance of past campaigns to refine future strategies.

They needed a dashboard that could provide visibility into:

- *Total product markets engaged*
- *Accounts actively showing intent*
- *Campaign reporting in real-time*

Solution

Using the **Audience Builder tool**, the marketing manager logs into the platform and instantly sees:

- Clear metrics for Product Markets and Accounts in Market with month-over-month performance indicators.
- Accounts currently in Market based on intent signals
- Quickly download and share the Recent Campaign Reports with the sales team

Impact:

*The **Audience Builder** application turned marketing from broad, unfocused campaigns into precision-targeted demand generation, directly impacting pipeline growth.*

AUDIENCE BUILDER OVERVIEW TABLE

Section	Description
Product Context	Audience Builder is a B2B SaaS platform designed for enterprise marketing and revenue teams to create targeted audience segments using intent, firmographic, and product-market data.
Platform & Technology Overview	Web application (desktop-first). ReactJS front-end, microservice backend, REST APIs, Docker-based deployment, and cloud-hosted data pipelines.
Tools & Technologies	Design: Figma, FigJam. Collaboration: Jira, Confluence, Slack. Engineering: ReactJS, REST APIs, Docker containers.
UX Methods & Approach	User journey mapping, information architecture, high-fidelity UI design, data visualization, component-level design, interactive prototyping, developer handoff.
Tech-Specific Design Considerations	React-ready component layouts, API-driven UI states (loading/error/empty), scalable information hierarchy for microservices, enterprise-grade data visualization.

Home Dashboard

THE HOME DASHBOARD PROVIDES A HIGH-LEVEL OVERVIEW OF MARKET ENGAGEMENT AND CAMPAIGN ACTIVITY,

User Problem Solved

Users previously struggled to interpret scattered intent signals and had no centralized view of product markets, active accounts, or recent campaign reports. This screen unifies all essential insights into a single, digestible view.

Value

Helps marketing managers make instant decisions based on real-time engagement.

The screenshot displays the 'Home' dashboard of the 'FOUNDRY' application. The interface includes a left sidebar with navigation links: Home, Product Market™, Custom Audiences, and Campaigns. The main content area features a welcome message for 'Olivia from VectraAI!' and a thank-you note for being an Enterprise License customer. Two key metrics are highlighted: 'Total Product Markets' at 20 (up 9% vs last month) and 'Accounts currently in market' at 5,785 (down 3% vs last month). Below these, a 'Recent Campaign Reports' section includes a search bar and a table of reports. The table has columns for 'File Name' and 'Report Date'. The reports listed are all for 'VectraAI - NA_3.30.23' with dates ranging from 3/19/23 to 3/24/23. A 'Settings' link is visible in the bottom left, and a user profile for 'Olivia Rhye' is in the bottom right. A yellow button with a left arrow is located in the top right corner.

Product Market

PROVIDES USERS WITH A CONSOLIDATED VIEW OF ALL GENERATED AUDIENCES WITHIN A SPECIFIC PRODUCT MARKET

User Problem Solved

Previously, users lacked clarity around which audiences were successfully generated, which ones failed, and how each audience type contributed to overall targeting. This screen centralizes all audience data, making monitoring, reviewing, and exporting significantly easier.

Value

Helps marketers and analysts review audience creation results and status updates.

Custom Audience

SERVES AS A CENTRAL HUB FOR MANAGING ALL SAVED AND ACTIVE AUDIENCE SEGMENTS USED IN MARKETING

User Problem Solved

Before this view, users lacked a structured way to manage multiple audience lists across regions and product categories. It was difficult to track audience size, engagement, and activation status.

Value

Ensures precise, data-driven segmentation for demand-generation campaigns.

Key Features & Insights

- **My Audiences Table:** Lists all saved audience segments with metrics like accounts count, contact volume, and activation status.
- **Status Tags (Leads/Ads/Inactive):** Visual cues help users instantly recognize which audiences are active, under ads, or paused.
- **Search Bar:** Helps filter long lists of audiences, essential for enterprise users managing dozens of segments.
- **Pagination:** Supports large datasets and ensures performance consistency.
- **Create Audience Button:** Clearly positioned CTA enabling users to build new audience segments quickly.

Design Decisions

- Tabular layout supports comparison across audiences.
- Right-aligned activation tags and metrics help users scan critical values efficiently.
- Structured hierarchy ensures that audience name remains the primary focus.

Business Impact

- Streamlined management of audience segments across global regions.
- Faster workflows for demand generation teams.
- Lower operational overhead by providing a unified view of audience readiness and activation.

Custom Audience

The screenshot displays a web interface for managing custom audiences. At the top right is a 'Create Audience' button. Below it is a search bar with a magnifying glass icon and the text 'search'. The main content is a table with three columns: 'Accounts', 'Contacts', and 'Activation'. The table contains ten rows of data. The 'Activation' column uses color-coded tags: green for 'Ads' or 'Leads' and grey for 'Inactive'. At the bottom of the table is a pagination control with a 'Previous' button, page numbers '1' and '2', and a 'Next' button with a right arrow.

Custom Audience Definition

HELPS USERS BUILD A CUSTOM AUDIENCE THROUGH LIST UPLOADS, EXCLUSIONS, AND KEY TARGETING FILTERS

User Problem Solved

Before this interface, users struggled with large, unstructured CSV uploads and lacked clarity on how included/excluded domain lists impacted audience size and quality. This screen introduces a guided, step-by-step configuration experience that reduces errors and increases confidence.

Value

Ensures precise audience creation through organized inputs and real-time validation.

The screenshot displays the 'Foundry' interface for defining a custom audience. The left sidebar contains navigation links: Home, Product Market™, Custom Audiences (highlighted), and Campaigns. The main content area is titled 'Vectra AI PM7 Custom' and includes a breadcrumb trail: Home > Custom Audiences > VAI PM 7 - Enterprise. The interface is divided into three tabs: Definition (active), Audiences, and Reports. The 'Definition' tab is further divided into sections: 'Account list' (with radio buttons for 'Target account list' and 'Ideal customer profile'), 'Excluded Accounts Lists', 'Buyer team', 'Intent', and 'Advanced'. The 'Target account list' section shows a CSV upload field with 'VectraAicrm.csv' selected and an 'Upload' button. The 'Excluded Accounts Lists' section shows a field with 'No excluded account list selected' and an 'Upload' button. The 'Buyer team', 'Intent', and 'Advanced' sections each have a right-pointing arrow. On the right side, there is a 'Summary' section with a donut chart showing '43,918 of available audience'. The chart is divided into three segments: 'Accounts w/ intent 50%' (dark blue), 'Decision Makers 30%' (light blue), and 'Influencers 20%' (yellow). Below the chart, there is an 'Intent score range' slider set between 75 and 100, and a text box indicating 'Intent - 5 Terms added'. At the bottom right, there is a 'Generate' button and a footer that says 'Made with VISME'.
